PREFACE TO THE LETTER M.

THE portion of the Dictionary which treats of the words beginning with M contains 12,988 Main words, 2,986 Special Combinations explained under these, 6,422 Subordinate entries, and 3,636 Obvious Combinations; in all 26,032 words. Of the Main words, 2,838 are marked † as obsolete, and 866 are marked ‖ as alien or not fully naturalized.*

Etymologically considered, the words beginning with M form a typical portion of the English vocabulary, every one of the many sources of our composite language being represented, while none is overwhelmingly predominant. The words inherited from Old English are relatively less numerous than in some other letters, but some of them occupy unusually large space in the Dictionary on account either of their great variety of senses and applications, or of the multitude of their combinations. Among them is the verb *make*, the article on which fills eleven pages, and would have been much longer if every subtle variety of meaning had been explained and illustrated. Other native words of importance are *man*, *meet* vb., *mind* sb. and vb., *moon*, *month*, *mother*, *much*, *more*, *most*. The articles on the pronouns *me*, *mine*, *my*, *myself*, and the auxiliaries *may* and *must*, contain much that is instructive as bearing on the history of English syntax and idiom. The Scandinavian element is very sparsely represented, chiefly by words of local or dialectal currency, such as *marram*, *maugh*, *may* (a maiden); but there are also *meek*, *mire*, and a few other words in general use. The Latin and French derivatives surpass the native words both in number and in the amount of space required for their treatment, and a very large proportion of them have an interesting history. Such instances as *manner*, *market*, *master*, *matter*, *measure*, *medicine*, *memory*, *mend*, *mischief*, *mission*, *mode*, *model*, *moment*, *monster*, *mount* vb., *move*, *movement*, *multiply* (to mention only a few of the more prominent) show how indispensable a part of the word-store of modern English has come from French. Greek derivatives are present in more than average proportions. Besides those which were introduced in the Middle Ages through the medium of Latin and French, such as *magic*, *mathematics*, *metaphysics*, *muse* sb.[1], *music*, *mystery*, there are many later formations, especially with the prefixes *mega-*, *meso-*, *meta-*, *micro-*, *miso-*, *mono-*; and the words beginning with *my-* are also mainly of Greek origin. Of words from Celtic there are nearly a score, but few, if any, of them would be recognized as familiar by Englishmen generally. The adoptions from Continental Teutonic, and from Italian and Spanish, are somewhat numerous. One very characteristic feature of the M portion of the Dictionary is the multitude of words from Oriental, African, Australian, and American languages. It may be noted that in Arabic *ma-*, *mi-* (or *me-*), and *mu-* (or *mo-*) are prefixes forming participia and other derivatives; formations of this kind, which have been adopted into English from Arabic through the medium either of European or Indian languages, are *macramé*, *magazine*, *mahal*, *marabout*, *Maugrabi*, *minaret*, *miskal*, *Mofussil*, *monsoon*, *Moslem*, *mosque*, *Mozarabic*, *muezzin*, *mufti*, *mullah*, *musellim*, *Mussulman*. As the sound of the letter M is one that lends itself easily to echoic use, the number of onomatopœic words with this initial is considerable.

Among the many words the etymology of which is here more fully or more accurately treated than in other English dictionaries are *macaronic*, *mad-apple*, *madrepore*, *maelstrom*, *magic lantern*, *major* sb.[1], *malignant*, *malmsey*, *mammon*, *mammoth*, *melanochroi*, *menstruum*, *meter* sb.[3], *methyl*, *middling*, *minus*, *minute*, *mire* sb.[1] and sb.[2], *mire-drum*, *miss* sb.[1], *mix* vb., *mohair*, *moor* vb.[1], *mother* sb.[2], *mould* sb.[2], *moxa*, *muckender*, *mustachio*, *mutton*, *mystery*.

The material for MA- was sub-edited (before 1888) and subsequently revised (before 1900) by Mr. Joseph Brown, M.A., of the Grammar School, Kendal, who has since sub-edited some part of S, and is now working at U; ME- and MI- were sub-edited in 1884–5 by the late Rev. T. Sheppard, Exeter College, Oxford; MO- to MOND- in 1885 by the late Hon. and Rev. S. W. Lawley, Spurfield, Exminster; MONE- to MUCE- by the late Mr. J. Anderson, Markinch, Fife; and the remainder of the letter (MUCH to the end) in 1894 by the late Rev. J. Smallpeice, M.A., then of St. Bees. In 1899–1904 the whole of the material from ME- to MYZ-, which in the interim had more than doubled in quantity, was laboriously re-subedited by Mr. James Bartlett, B.A., Cloverlea, Bramley, near Guildford.

Among those who have rendered help of various kinds in the later stages of preparation of this portion of the Dictionary, it is fitting to mention in the first place three honoured workers who are no longer living to receive the grateful acknowledgement which is their due. Lord Aldenham, who had been a zealous and able collaborator in the work from its beginning, continued, in spite of his advanced age, to read the proofs, and to furnish valuable suggestions, until very shortly before his death. Dr. W. Sykes, F.S.A., who died in September, 1906, had read the proofs for the greater portion of the letter M, supplying a great number of

additional instances of the words relating to medicine and the kindred sciences. Mr. E. L. Brandreth, whose abundant work for the Dictionary has been acknowledged in the prefaces to former issues, had latterly devoted himself to the verification at the British Museum of quotations from works not accessible in Oxford, a service which since his death has been performed by Mr. W. W. Jenkinson. In the revision of the proofs continued aid has been received from Mr. A. Caland, of Wageningen, Holland, the Rev. Canon Fowler, D.C.L., of Durham, Mr. H. Chichester Hart, the Rev. Professor Skeat, and the Rev. W. B. R. Wilson, of Dollar. For information on etymological questions thanks are due to Professors Margoliouth, Morfill, Napier, and Wright, of Oxford; Prof. A. Salmon, of Reading; Hr. Verner Dahlerup, of Copenhagen; Dr. A. Kluyver, of Leiden; and Mr. J. Platt, jun., whose extensive researches into the history of words from American Indian and other remote languages have been of great service. In the explanation of scientific terms valuable aid has been received from Professors Clifton and Love, Dr. V. H. Veley, Mr. A. E. Jolliffe, and Mr. C. Leudesdorf, of Oxford, and Prof. Sylvanus Thompson, of London. Among others who have rendered help on special points are Professors Bywater and Robinson Ellis, of Oxford; Sir W. R. Anson, Bart.; Sir Howard Elphinstone, Bart.; Mr. Horace Hart, M.A., Controller of the Oxford University Press; Mr. E. W. Hulme, of H.M. Patent Office; Sir F. Pollock, Bart.; Mr. W. H. Stevenson, M.A., of St. John's College, Oxford; Mr. R. J. Whitwell, B.Litt., Oxford; Mr. J. Maitland Anderson, St. Andrews University; and Mr. C. W. Ernst and Mr. Albert Matthews, of Boston, U.S.A. The constant assistance of Dr. F. J. Furnivall has, in this as in all former parts of the work, been of inestimable value. Special thanks are also due to Bodley's Librarian, Mr. Falconer Madan, Mr. A. E. Cowley, and the staff of the Bodleian Library generally; and to the Editor of *Notes and Queries* and the many correspondents of that periodical who have furnished replies to inquiries.

The members of the editorial staff who have been engaged on M are: Mr. Walter Worrall, B.A., Mr. C. T. Onions, M.A. (who has specially prepared the portions containing the words beginning with *Mis-*, *Multi-*, and *My-*), Mr. W. J. Lewis, Mr. H. J. Bayliss, Mr. James Dallas, Mr. G. R. Carline, and Miss E. S. Bradley.

ADDITIONS AND EMENDATIONS.

Machit, var. of MESQUITA 2.

Macute. The Rev. W. Holman Bentley, writing from the Congo Free State, informs us that *makuta* is the plural of **ekuta*, and denotes a bundle of ten mats of palm-fibre, still used as currency north of the Congo near the French frontier. Elsewhere the word survives only as the name of the Angola 'penny' piece or its value. Mr. Bentley says that it is derived from a Congo verb *kuta* to tie, now obsolete, but preserved in the reversing form *kutulula* to untie.

Mademoiselle. Earlier example:—*a* 1450 *Knt. de la Tour* (1868) 126 Madamoiselle! y praie you that ye ansuere not vnto this fole.

Man *sb.*[1] 15. The view that CHESS-MEN originated as a corruption of *chess-meinie* is untenable, the word for '(chess-)man' in AF. being regularly *hom*. Earlier instances of *man* in this sense are:—*c* 1400 *Beryn* 1820 The Burgeyse seid: 'comyth nere! ye shul se þis man, How he shall be matid, with what man me list!' He drouȝe, & seyd 'chek mate!' *c* 1440 *Gesta Rom.* xxi. 71 (Harl. MS.) The first man, þat goth afore hath not but oo poynt, but whenne he goth aside, he takith anoþer. . . M.

M (em), the thirteenth letter of the modern and twelfth of the ancient Roman alphabet, represents historically the Greek *mū* and the Semitic *mēm*. The Phœnician form of the letter is 𐤌, whence the early Gr. and L. 𐌌, ⋏, **M**. Its phonetic value has varied little; in Eng. it has always expressed what was doubtless its original sound, that of the bilabial nasal consonant, which is normally voiced, though when it is followed by an unvoiced consonant it has an unvoiced ending. Like the other nasals, *m* is capable of being used as a sonant or vowel, denoted by (ˈm) in the phonetic notation here employed; but in Eng. this occurs only after ð and z at the end of words (of Gr. etymology), as *rhythm*, *spasm*, *schism*, and the suffix *-ism*; in these words many speakers substitute (-əm). The letter is never silent, exc. initially before *n* in Gr. derivatives, as *mnemonic*.

1. Used *vocatively*, as the usual oral equivalent of Madam.

Now only used parenthetically or at the end of a sentence. Formerly the ordinary respectful form of address to a woman (originally only to a married woman) of equal or superior rank or station (unless entitled to be called 'my lady'). The present tendency is to confine it to the speech of servants or other persons of markedly inferior position. (Used at Court, instead of *madam*, in addressing the Queen or a royal princess.)

1668 Dryden *Evening's Love* III. i. (1671) 33 Madam me no Madam, but learn to retrench your words; and say Mam; as yes Mam, and no Mam, as other Ladies Women do. Madam! 1. *trans.* To make or repair (a road) according to J. L. M°Adam's system, which consists in laying down successive layers of stone broken into pieces of nearly uniform size, each layer being allowed to consolidate under the pressure of ordinary wheel traffic before the next is laid upon it.

See M°Adam's pamphlet, *Remarks on the Present System of Road-Making* (ed. 5, 1822). He did not approve of the placing of any kind of foundation under the layers of stone, of the use of sand or gravel as 'binding' material, or of the smoothing of the surface by heavy rollers; though the name of 'macadamizing' is now often given to methods in which some or all of these practices are admitted.

Macrocosm (mæ·krɔkɒzm). Also rarely in L. and quasi-Gr. forms: 7 **macrocosmus**, 9 **-cosmos**. [ad. F. *macrocosme* (*c* 1300), ad. med.L. *macrocosmus*, repr. Gr. **μακρὸς κόσμος* (*μακρός* long, great, *κόσμος* world). (Cf. MEGACOSM.)

Although med.L. *macrocosmus* has not been found earlier than in Higden (*c* 1350) it must be the source of the Fr. form recorded *c* 1300, and it seems to imply the prior existence of a Gr. phrase **μακρὸς κόσμος* formed in imitation of *μικρὸς κόσμος* MICROCOSM. For the idea expressed, cf. Macrobius *in Somn. Scip.* I. xii, 'Ideo physici mundum magnum hominem, et hominem brevem mundum esse dixerunt'. From the use of *brevem* here, and the gloss 'Microscosmum .. *petit monde, c'est l'homme qui pou dure*' (Du Cange), it may be suspected that *μακρός* was at first intended in the sense of 'long', interpreted with regard to duration; though the inference is not absolutely necessary, as the formal similarity of the word to *μικρός* would sufficiently account for its selection in an antithetic phrase. However this may be, the relation of the words *macrocosm* and *microcosm* has suggested the use of MACRO- with the sense 'on a large scale', in many modern words antithetic to words beginning with *micro-*.]

1. The 'great world' or universe, in contradistinction to the 'little world' or MICROCOSM, i. e. to man viewed as an epitome of the universe.

The earliest instances of the word in Eng. occur in Lydgate's *Assembly of the Gods* (*c* 1420; oldest MS. *a* 1500), where however it is a mistake (either on the part of Lydgate or of the scribe) for *microcosm.* (See, e.g., line 1828: And as for Macrocosme, hit ys no more to say But the lesse worlde.)

1600 W. WATSON *Decacordon* (1602) 274 Throughout all this vaste Macrocosme, they finde not one patterne..like to ours. 1794 G. ADAMS *Nat. & Exp. Hist.* 9 He desires, first, to see the spirit of the Macrocosmos. 1881 HUXLEY in *Nature* No. 615. 346 The microcosm repeats the macrocosm.

2. *transf.* In various occasional applications, denoting some great whole, the structure of which is conceived to be imaged on a smaller scale by that of some constituent portion of it.

Macute (măkiū·t). Also 8 macuta, macute, macoute, 8–9 macuta. [ad. native African *macuta.*] At the beginning of the 18th c., said to be the name for one of the pieces of cloth used as money by the negroes of the Congo. Subsequently used in the W. Madam (mæ'dəm), *sb.* Forms: 3–6 **madame**, 4–5 **madam** *Sc.* **madem**(**e**, 5 **maydame**, 6 **maddamo**, 4–9 **madamo**, 4– **madam**. [a. OF. *ma dame* (in mod.Fr. written Madame), literally, 'my lady' (see Dame, Dam), corresp. etymologically to It. *madonna, monna*, med.L. *mea domina*.

The spelling *madame* is still preferred by some writers, but the more general and convenient practice is to write *madam* when the word is used as English, and Madame when it is used as a foreign title. For the plural (in sense 1) Mesdames is now used; the Eng. plural is obs. exc. in sense 3.]

1. A form of respectful or polite address (substituted for the name) originally used by servants in speaking to their mistress, and by people generally in speaking to a lady of high rank; subsequently used with progressively extended application, and now capable of being (in certain circumstances) employed in addressing a woman of whatever rank or position. (Corresponding to Sir.)

The early occurrence of Dame in the sense of mother suggests that in AF. and early ME. *ma dame* was very commonly used by children to their mother; but in the extant examples the mother so addressed is a queen or a lady of very high rank. In Chaucer's time (*C. T. Prol.* 376) to be addressed as *madame* was one of the advantages which a citizen's wife gained by her husband's being made alderman; this probably indicates the lowest social grade in which at that time the title could be claimed as a matter of customary right. In poetry of the 14th and 15th c. the lover often addresses his mistress as *madame*. Nuns (originally only the elder ones: see quot. *c* 1400) were called *madame* down to the Reformation.

While in France the title has (with certain customary exceptions) been confined to married women, in England no such rule has been generally adopted, though there are traces of a tendency in the 16–17th c. to address matrons as 'madam' and spinsters as 'mistress'.

From the 17th c. *madam* has been the title normally used in beginning or subscribing a letter to a woman of any station, except where the use of the name (as in 'Dear Mrs. A.' etc.) is permitted ('my lady', etc. not being admitted in epistolary usage). In oral use the title now rarely occurs; from the 18th c. it has been, except in very formal use, largely superseded by the contracted form Ma'am, which has itself in recent years been greatly restricted in currency; however, *madam* is in London and other towns still the word commonly used by salesmen to their female customers, and by persons in the position of servants to the public.

1. The title prefixed to the surname of a French married woman (corresponding to the Eng. 'Mrs.', 'Lady', etc., according to degree of rank). Abbreviated *Mme.*; in Eng. books and newspapers *Mdme.* often occurs.

In English use it is very commonly applied to a married woman belonging to any foreign nation (substituted, e.g., for the Ger. *Frau* or the Du. *Mevrouw*). It is also frequently assumed (instead of 'Mrs.') by English or American professional singers or musicians, and by women engaged in businesses such as dressmaking, in which native taste or skill is reputed to be inferior to that of Frenchwomen.

Madrepore (mædrĭpoə). [ad. mod.L. *madrepora* or F. *madrépore* (1710), ad. It. *madrepora*.

The Italian naturalist Ferrante Imperato (*Hist. Nat.*, 1599) uses *poro* as a name for 'a kind of vegetable the substance of which resembles that of coral, but differs in being porous'. He evidently regarded this word as identical with the ordinary It. *poro*, ad. L. *porus* Pore *sb.*; but perh. it really represented late L. *pōrus*, a. Gr. πῶρος calcareous stone, stalactite. Among the species of 'poro' he enumerates *millepora, frondipora*, and 'those plants by some called madrepores (here *madripore*, but elsewhere *madrepora* occurs), which are tubular growths, issuing from a common stem, and attached together at their roots, so that they resemble a honeycomb'. The word *madrepora* (which Imperato app. did not invent) seems to be f. *madre* mother + *poro*, the ending of the latter being changed to suit the gender of the sb. prefixed in apposition; on this view, the other words, *millepora, frondipora*, etc., must have been formed later in imitation of *madrepora*. A comparison of Imperato's woodcut of the 'madrepores' with those of the other species of *poro* seems to suggest that the prefix 'mother' may refer to the appearance of prolific growth characteristic of this 'plant'.]

Madrigal (mæ·drigăl), *sb.* Also 6-7 **-ale, -all.** [ad. It. *madrigale* (whence Fr., Sp. *madrigal*).

The origin of the It. word is obscure. On the ground of the occurrence in early It. of the variant forms *madriale, mandriale* (cf. obs. Gr. *μάνδρα* fold; the primitive sense according to this view would be 'pastoral song' (cf. quots. 1597, 1614 in 3).]

The use of *maelstrom* as a proper name (also in Fr.) seems to come from Du. maps, e.g. that in Mercator's *Atlas* (1595). Dutch philologists are of opinion that the word is native. It is true that it is found in all the mod. Scandinavian langs. as a common noun, but it is purely literary, and Danish scholars regard it as adopted from Du. or LG. The earliest known instance of Da. *malstrøm* (formerly also written *malestrøm*) occurs in 1673 in Debes *Færoa reserata*, the author of which was a pastor in the Færöe Islands. Cf. Norw. dial. *malstraum* (admitted by Aasen to be 'little used', which prob. means that he had never heard it in actual popular use), Sw. *malström*, Færoic *mal(n)streymur* (Hammershaimb *Færøsk Anthologi*, Glossary; the vb. *mala* in Færoic means 'to grind', 'to whirl round').

1. The pretended art of influencing the course of events, and of producing marvellous physical phenomena, by processes supposed to owe their efficacy to their power of compelling the intervention of spiritual beings, or of bringing into operation some occult controlling principle of nature; sorcery, witchcraft. Also, the practice of this art.

The 'magic' which made use of the invocation of evil or doubtful spirits was of course always regarded as sinful; but *natural magic*, i. e. that which did not involve recourse to the agency of personal spirits, was in the Middle Ages usually recognized as a legitimate department of study and practice, so long as it was not employed for maleficent ends. Of 'natural magic' as understood by mediæval writers, typical examples are the making of an image, under certain astrological conditions, in order to injure or benefit the health of the person represented; and the application of a medicament to a weapon in order to heal the wound made by it. These things, if now practised, would still be called 'magic', though the qualification 'natural' would seem quite inappropriate. On the other hand, the 'natural magic' of the Middle Ages included much that from the standpoint of modern science is 'natural', but not 'magical', the processes resorted to being really, according to the now known laws of physical causation, adapted to produce the intended effects.

Magnanimity (mæ:gnăni·mĭti). [a. F. *magnanimité*, ad. L. *magnanimitāt-em*, f. *magnanimus* MAGNANIMOUS.]

† **1.** Used (with somewhat vague meaning) as the name of one of the virtues recognized in mediæval ethics. *Obs.*

Primarily this represented the Aristotelian *μεγαλοψυχία* (see 3), but in scholastic descriptions the notion was modified in accordance with Christian ideals, and blended with elements suggested by the etymology of the L. word (*animus* being capable of the sense 'courage'); hence 'magnanimity' is often classed as a subdivision of 'fortitude' (so Aquinas, following Macrobius *In Somn. Scip.* I. viii. § 7).

3. In the Aristotelian sense of *μεγαλοψυχία* (see below). Also, loftiness of thought or purpose; grandeur of designs, nobly ambitious spirit. Now *rare.*

In Aristotle the word (by modern translators rendered 'greatsouledness', 'highmindedness') expresses the attitude of one who, rightly conscious of his own great merits, is indifferent to praise except from those whose approval is valuable, regards the chances of fortune with equanimity, and, while ready to confer benefits, will seldom condescend to accept them.

It is not clear which of these two senses gave rise to the alchemical use; the brilliant lustre ascribed by the alchemists to 'magnesia' favours the latter view, and the substance seems not to have been identified with the loadstone, in spite of the resemblance of its name to the familiar word *Magnes*.]

[This use prob. arose from the notion that manganese was a form of the 'magnesia' of alchemy. There may, however, have been some early confusion of manganese with loadstone: Pliny *N. H.* xxxvi. lxvi says that loadstone (*magnes lapis*) was used in making glass. In the Latin of early chemistry the word was applied to various other substances: e.g. *magnesia opalina* was a red sulphide of antimony (? = Kermes 3).]

[This application of the word seems not to be connected with the use in sense 1, but to have been suggested by the mod.L. *magnes carneus* 'flesh-magnet', applied *c* 1550 by Cardan (*De Subtilitate* VII, Opera III. 475) to a white earth resembling osteocolla, because it was found to adhere strongly to the lips, and was therefore supposed to have the same attraction for flesh that the loadstone has for iron. Trans.* XCVIII. 346, I shall venture to denominate the metals from the alkaline earths barium, strontium, calcium, and magnium: the last of these words is undoubtedly objectionable, but magnesium [*footnote refers to* Bergman *Opusc.* II. 200] has been already applied to metallic manganese.

2. A chemical element, one of the 'metals of the alkaline earths', being the base of magnesia.

Though one of the most widely diffused of elements it is found in nature only in composition, and was discovered by Sir H. Davy in 1807 and first successfully separated by Bussy in 1830, as a light silvery metal, ductile and malleable, which is stable in dry air but tarnishes when exposed to moisture, and burns with a blinding white light when held in a flame. Symbol Mg.

2. A piece of loadstone; also, a piece of iron or steel to which the characteristic properties of loadstone have been imparted, either permanently or temporarily, by contact with another magnet, by induction, or by means of an electric current. A magnet has an axis, at the extremities of which (the 'poles') the attractive power is greatest, and at the middle of which it becomes *nil*. When suspended freely, a magnet assumes such a position that one of its poles (hence called the north pole) points approximately north, and the other (the south pole) approximately south; the like poles of two magnets repel each other, while the unlike poles attract each other.

Magne·to-ele·ctric, *a.* Pertaining to electric phenomena involving electric currents induced in conductors by the relative motion of these conductors with respect to either permanent magnets or electro-magnets.

Introduced, in 1831, by Faraday, who employed it in its most general sense for describing the currents induced by motion of conduction in conjunction with any of the following kinds of magnet: permanent steel magnets, ordinary loadstones, electro-magnets, the earth. He used it tentatively at first in contradistinction to the term *volta-electric*, which he applied to the induction of electricity by turning on or turning off an electric current in a stationary coil.

1831 FARADAY in *Phil. Trans.* (1832) CXXII. 139 As a distinction in language is still necessary, I propose to call the agency thus exerted by ordinary magnets, *magneto-electric* or *magnelectric* induction. *Ibid.* 173 Upon the supposition that the rotation of the earth tended, by magneto-electric induction, to cause currents in its own mass. 1833 *Ibid.* CXXIII. 44, I had the pleasure..of making an experiment, for which the great magnet [a loadstone] in the museum ..and the magneto-electric coil described in my first paper, were put in requisition. 1834 — in *Philos. Mag.* V. 349 When I first obtained the magneto-electric spark it was by the use of a secondary magnet. .. My principal was an electromagnet; Nobili's was, I believe, an ordinary magnet; others have used the natural magnet. 1839 J. F. DANIELL *Introd. Chem. Philos.* 489 Magneto-electric is the converse to electro-magnetic action. 1854 G. BIRD & C. BROOKE *Elem. Nat. Philos.* xvii. (ed. 4) 421 *note*, Similarly, electro-magnetic induction would mean the development of magnetism by a current, and magneto-electric induction, that of a current by magnetism. 1881 MAXWELL *Electr. & Magn.* II. 208 This is the electromotive force which must be supplied from sources independent of magneto-electric induction.

b. Magneto-electric current. Used by Faraday to distinguish currents generated mechanically by magneto-electric induction from those generated in a voltaic battery.

1851 FARADAY in *Phil. Trans.* CXLII. (1852) 137 On the employment of the Induced Magneto-electric Current as a test and measure of Magnetic Forces.

c. Magneto-electric machine. First used by Faraday, in 1831, to denote a machine generating currents by magneto-electric induction. By later writers employed in variously limited senses.

The appellation continued to be used in Faraday's wide sense by various writers down to about 1867, when the improvements of Wilde, Wheatstone, Siemens, Ladd, Varley and others attracted much attention, and the term 'dynamo-electric machine' was introduced by Brooke. This term was defined by Brooke himself to denote in general a machine 'in which dynamic energy is employed to produce an electric current' (*Proc. Roy. Soc.* XV. 499, *footnote*); by others, however, it has been applied to signify only such machines as embodied the principle of self-excitation and did not contain any permanent magnets. Those who adopted the latter usage limited the meaning of 'magneto-electric machine'; some including under that term only the machines with permanent magnets of steel, while others included under the name both these and the machines with separately-excited electro-magnets. The present tendency is to confine the term strictly to the machines with permanent steel magnets. Some writers define magneto-electric machines as simply old-fashioned or rudimentary kinds of dynamos; others treat the terms as synonymous. On the other hand some writers treat 'magneto-electric machine' as a generic term, of which dynamo-electric machines form a sub-class.

1831 FARADAY in *Phil. Trans.* (1832) CXXII. 160 Two rough trials were made with the intention of constructing magneto-electric machines. *Ibid.* 163 [Under heading *Terrestrial Magneto-electric Induction,* describes as magneto-electric machines discs of copper caused to revolve, and thereby generate electric currents under the magnetic influence of the earth.] 1866 CROOKES in *Q. Jrnl. Sci.* XII. 504 Magneto-electric machines, with revolving armatures, in which electro-magnets had been substituted for permanent magnets, had been constructed. 1867 WHEATSTONE in *Proc. Roy. Soc.* XV. 369 The magneto-electric machines which have been hitherto described are actuated either by a permanent magnet or by an electro-magnet. 1878 *Proc. Inst. Civ. Engin.* LII. 63 M. Alfred Niaudet remarked that he did not agree with..the distinction between dynamo-electric and magneto-electric machines. In all these instruments mechanical power was converted into electricity by the action of magnetism; consequently all were both magneto-electric and dynamo-electric. 1878 J. N. SHOOLBRED *Pres. State Electric Lighting* 6 For the older form, where permanent magnets are employed, the term 'magneto-electric' machine has been retained. 1880 A. SIEMENS in *Jrnl. Soc. Telegr. Engin.* IX. 93 A constant and permanent magnetic field is, therefore, of paramount importance, and it can be produced in the way proposed by Mr. Wilde in 1863 for magneto-electric machines by employing a separate machine for exciting the field-magnets of one or more similar machines. 1882 S. P. THOMPSON in *Jrnl. Soc. Arts* XXXI. 120 The arbitrary distinction between so-called magneto-electric machines and dynamo-electric machines fails when examined carefully. In all these machines a magnet, whether permanently excited, independently excited, or self-excited, is employed to provide a field of magnetic force. And in all of them dynamic power is employed. 1887 W. B. ESSON *Magneto- & Dynamo-electric Machines* 22 In all the machines yet described, the electric currents were induced by means of steel magnets, or, as in Wilde's machine, by magnets that were magnetised by the current produced in another machine. Such machines are usually called 'magneto-electric' machines, to distinguish them from the 'dynamo-electric' machines. 1889 *Chambers's Encycl.* IV. 146/2 The term 'dynamo-electric' was at first applied to distinguish those machines which were self-exciting from 'magneto-electric' machines, which had permanent magnets to give the field; but this distinction is no longer maintained. 1891 J. W. URQUHART *Dynamo-Constr.* 2 A magneto-electric machine—an apparatus in which steel magnets are used to furnish the 'magnetic field'—is not strictly by common consent called a dynamo.

OE. *mægen-* (MAIN *sb.*[1]) in compounds, and partly an adoption of the cognate ON. *megenn*, *megn* adj., strong, powerful; in some uses (e. g. in MAIN SEA = ON. *megensiór*) it seems to represent ON. *megen-* (= MAIN *sb.*[1]) in compounds.

It is doubtful whether the development of the Eng. word owes anything to the influence of OF. *maine*, *maigne* great:—L. *magnus*. The OFr. word is purely poetical, and occurs chiefly as an epithet of kings and nobles; it may prob. have influenced the use of *main* by ME. poets, but the only unequivocal evidence of its adoption is the 15th c. Sc. *Alexandir the mane*, *Charlis the mane* (see MANE *a.*).]

By the legal antiquaries of the 16th c., the 'taking in hand' etymologically implied by AF. *mainprise*, med.L. *manucaptia*, was supposed to denote the act of 'receiving into friendly custody' the person who would otherwise have been committed to prison (cf. BAIL *sb.*[1] 3), and the later definitions of *mainprize* and *mainpernor*, e.g. those of Cowell and Blackstone (see MAINPERNOR) are worded in accordance with this misapprehension.

In the earliest example (*c* 1485) the *hat of maintenance* is worn by the members of the Holborn Quest. Afterwards the *cap of maintenance* is mentioned by contemporaries as having been given by the Pope thrice to Henry VII and once to Henry VIII; in 1551 it is referred to as one of the insignia of a prince. In the 17th c. and later it appears chiefly as borne, together with the sword, before the Lord Mayor, and before the Sovereign at his coronation. A kind of cap, with two points like horns behind, borne in the arms of certain families either as a charge or in the place of a wreath, is described by heralds as a 'cap of maintenance'; cf. quot. 1700.

2. Preceded by a possessive, *your, his, her, the king's, the queen's*; sometimes with a qualifying epithet, as (*most*) *sacred, gracious,* †*royal.* Used as an honorific title in speaking to or of a king, queen, emperor, or empress. In this use *Your Majesty* is a respectful substitute for the pronoun *you*, and *His, Her Majesty* (abbreviated H. M.) may be either prefixed to such designations as *the King, the Queen, King Edward VII*, etc., or substituted for them; so, in modern use, *Their Majesties*, when more than one royal person is meant. Also, with distinguishing epithet: *His, Her Imperial Majesty* (abbreviated H. I. M.), said of an emperor or empress; *His Britannic Majesty* (abbreviated H. B. M.), the King of Great Britain (and Ireland); *His Catholic Majesty*, the King of Spain; *His Most Christian Majesty* (Hist.), the King of France; in jocular language, *His Satanic Majesty*, the Devil, Satan.

This use, common to all the Rom. langs., and from them adopted into all the living Tent. langs., descends from the Latin of the later Roman empire (*tua, vestra majestas*). In England it occurs, in its Latin form, from the 12th c., though examples of the vernacular form are not met with before the 15th c. It was not until the 17th c. that *your majesty* entirely superseded the other customary forms of address to the sovereign. Henry VIII and Queen Elizabeth were often addressed as 'Your Grace' and 'Your Highness', and the latter alternates with 'Your Majesty' in the dedication of the Bible of 1611 to James I.

The English syntax of this word (as of the other abstract nouns similarly employed as titles, e. g. *highness, lordship, grace, excellency*) is somewhat inconsistent. Although *Your Majesty*, like *His, Her Majesty*, requires the following verb to be in the 3rd person sing. to agree with the sb., this principle of concord is not applied to the pronouns, as in Fr. and some other langs. The neuter pronouns *it, its, which*, cannot be used with reference to a foregoing (*Your, His, Her*) *Majesty*; either the titular phrase must be repeated, or the pronoun must be the same as if the simple form ('you', or 'the king', 'the queen') had been used instead of the periphrastic form.

[Com. WGer.: OE. *macian* = OFris. *makia*, OS. *macon* (LG., Du. *maken*), OHG. *mahhôn* (MHG., mod.G. *machen*), app. f. **mako-* fit, suitable (see MAKE *sb.*[1]). On this view the primary sense would be 'to fit, arrange'; but in the earliest known stages of the WGer. tongues the verb corresponded generally to the L. *facere* in such of its senses as were not expressed by Do. The MSw. *maka* to make, construct (mod.Sw. *make* to move), Da. *mage* to manage, arrange, appear to have been adopted from LG.

Many senses which later Eng. shares with continental Teut. are not recorded in OE., or not until near the end of that period; possibly the vb. originally had some of these meanings, but was displaced in the literary dialect by synonyms. Materials are wanting for a genealogical arrangement of the senses; the order of the main branches in the following scheme has been adopted on grounds of convenience. The word is not very frequent in OE.; the most prominent uses are in causative and factitive applications (see 48, 49, 52) and in the phrase *hit macian* 'to make it'= to act, behave (see 68).]

I. Senses in which the object of the verb is a product or result.

*To bring into existence by construction or elaboration. (Not common until late in OE.; the L. *facere* is usually rendered by *gewyrcan*.)

1. *trans.* To produce (a material thing) by combination of parts, or by giving a certain form to a portion of matter; to construct, frame, fashion.

Formerly common in various applications in which vbs. of more specific meaning are now almost universally employed; used, e.g. for to build or erect a house, town, column, ship, to paint a picture, to carve or sculpture a statue.

59. With sbs. expressing the action of vbs. (whether etymologically cognate or not), *make* forms innumerable phrases approximately equivalent in sense to those verbs. In some of these phrases the obj.-noun appears always without qualifying word; in others it may be preceded by the indefinite article, or by a possessive adj. relating to the subject of the sentence. When standing alone, the combination of *make* with its object is equivalent to a verb used *intr.* or *absol.*; but in many instances the obj.-noun admits or requires construction with *of*, and this addition converts the phrase into the equivalent of a transitive verb. In this Dictionary these phrases are usually illustrated (and if necessary explained) under their respective sbs.; but a selection of them is given here in order to exhibit the variety of applications. (For the illustration of those phrases which are enumerated without quotations, see the sbs.)

Many of the ME. phrases of this type are literal renderings of phrases with L. *facere* or F. *faire*, the sb. being often adopted from one of those languages. In early use a gerund in *-ing* was often the obj. of *make*, but this is now rare.

a. The following are still more or less in use: *To make an abatement*, (*one's*) *abode*, *abstraction*, *an acknowledgement*, *an acquisition*, *an address*, *an advance*, (*an*) *affirmation*, *an allegation*, (*an*) *allowance*, *an animadversion*, (*an*) *answer*, *an appeal*, *an* (also *one's*) *appearance*, (*an*) *application*, *an ascent*, *an assault*, *an assay*, *an assertion*, (*an*) *assurance*, *atonement*, *an attack*, *an attempt*, (*an*) *avowal*, *an award*, *a beginning*, *a bid*, *a blunder*, (*a*, *one's*) *boast*, *a calculation*, *a call*, *a challenge*, *a change*, (*a*) *choice*, (*a*) *claim*, *a climb*, *a comment*, *a comparison*, *a complaint*, *a computation*, *a cut*, *a dash*, *a defence*, *delay*, *a demonstration*, *a discovery*, *a donation*, *an endeavour*, *an entrance*, *an error*, *an essay*, *an excavation*, (*an*) *exception*, (*an*) *exchange*, (*an*) *excuse*, *an experiment*, *an explanation*, *a find*, *a gift*, *a grant*, *haste*, *an incision*, (*an*) *inquiry*, *inquisition*, *intercession*, *a joke*, *lamentation*, *a landing*, *mention*, *a mistake*, *a motion*, *mourning*, *a move*, *narration*, (*an*) *oath*, (*an*) *objection*, *an observation*, *an offer*, *an offering*, *a* (*one's*) *petition*, *pretence*, *pretension*, (*a*) *proclamation*, (*a*) *profession*, *a proffer*, *progress*, *a promise*, *proof*, *a proposal*, *a proposition*, *a protest*, *provision*, *a recovery*, *a remark*, (*a*) *reply*, *reprisals*, (*a*) *request*, *resistance*, *restitution*, (*a*) *retreat*, *a sacrifice*, *a sale*, (*a*) *search*, (*a*) *shift*, *a shot*, *slaughter*, *a slip*, *a stand*, *a start*, *a stay*, *a surrender*, *a transition*, *a translation*, (*a*) *trial*, *use*, *one's vaunt*, *a venture*, *a vow*.

Mal- (mæl), *prefix*, formerly often written male- (but pronounced as one syll.), chiefly represents the F. *mal* adv.:—L. *male* ill, badly; rarely, as in *maltalent*, it represents the OF. *mal* adj.:—L. *malus* bad. In its advb. use the prefix occurs in many adoptions from Fr., which are sometimes combinations with vbs., as *maltreat*; sometimes nouns of action formed from such combinations, as *malfeasance*; and sometimes combinations with adjs., where the prefix serves to reverse the favourable connotation of the word, as *maladroit, malcontent.* In imitation of these adopted words, *mal-* has from the 16th c. been prefixed to many Eng. words, to convey the sense 'ill', 'wrong', 'improper(ly)'. The words thus modified are chiefly nouns of action, as in *malpractice*, and many physiological terms, as *malassimilation, malformation*; occasionally adjs. and vbs., as in *malodorous, malappropriate.* The formations that have a permanent character are treated in their alphabetical places; examples of the frequent use of the prefix in the creation of nonce-words are *mal-accident, -application, -appointment, -associa-*

App. identical with the med.L. *melegeta*, the name of a spice mentioned *c* 1214 in connexion with cloves and cardamoms, and said *a* 1331 to be among the productions of Java (see Du Cange). Both the authors cited are Italian, and in 1486 Simon a Cordo (*Clavis Sanationis*) explains the word as a dimiautive of It. *melica* millet, remarking that the grains resemble those of millet. This seems probable; but if the word be of European origin, it has either been adopted in a corrupt form into some West African langs., or confused with a native word, the source of the earliest Eng. form and of the F. *maniguette*. In 1599 Towrson (Hakl. *Voy.* II. ii. 27), in a list of phrases from the lang. of Guinea, gives '*manegete afoye*, graines ynough'. Miss M. Kingsley, *West Afr. 6. *Law.* **a.** Wrongful intention generally. **b.** That kind of evil intent which constitutes the aggravation of guilt distinctive of certain offences (*esp.* of murder), or which deprives some act, on the face of it unlawful, of a justification or excuse that might otherwise have been allowed.

The first meaning mentioned under b was originally expressed by the A.F. phrase *malice purpensé* or *prepense*, which in modern legal language appears as *malice prepense* (see PREPENSE *a.*) and in the translated form *malice aforethought*. In early use the phrase occurs in many anglicized forms: *malice prepensed, purpensed, pretensed* (also *prepensed*, etc. *malice*); occasional variants found in non-technical writers are *malice propense* (17th c.), *malice prepensive* (Fielding), *malice perpended* (Charles Lamb). For examples see the various adjs.

The words 'malice', 'malicious', and 'maliciously' were formerly used in pleading, and thence in forensic and judicial language, in many places where they were superfluous.

Mamlouk, mamluk(e, obs. ff. MAMELUKE.

Mamma[1], **mama** (māmă·). [A reduplicated syllable often uttered instinctively by young children, who are in many countries taught to use it as their word for 'mother' (esp. where the ordinary word in the language begins with *m*).

The Indogermanic type **mammā*, as a child's word for mother, is found as Gr. μάμμη, L. *mamma* (whence It. *mamma*), OSl., Russian МАМА, Lith. *mama*, Irish *mam* (O'Brien); also in Welsh *mam*, which is the only word for 'mother', though *modr-* survives in some compounds. The F. *maman* (Cotgr. 1611 *mammam*), like the earlier *mam-ma* (1534 in Hatz.-Darm.), appears to be an independent adoption of the instinctive infantine utterance; the Sp. *mamá*, Pg. *mamãe*, may perhaps be from French.

Apart from the two 16th c. quots. in which the word is used with reference to a child's first attempt to speak, the Eng. *mamma* has not been found earlier than near the end of the 17th c., after which time it rapidly became common. The Eng. word of the 17–18th c. (rimed by Shadwell with *awe*) prob. represents a spoken form adopted from the F. *maman*; the spelling may have been suggested by Latin or It., or it may possibly have been originally meant to express the native English form (ma·mă, mə·mă), which is still current in many dialects. In educated use, so far as is known, the stress has in England always been on the last syllable; in the United States, however, the stress *ma·mma* is the more usual; a prevailing U. S. pronunciation is represented by the spelling *momma*, occasionally used in novels. The spelling *mama*, sometimes used in the 18th c., became somewhat common after 1800, and is especially frequent in the novels printed *c* 1830–50. It is now rare.]

A word employed as the equivalent of *mother*: chiefly used in the vocative, or preceded by a possess. pronoun (as 'my mamma'); also without article in the manner of a proper name (e.g. 'Mamma is well'); less usually with *a*, *the*, or in *plural*.

The status of the word has always been the same as that of PAPA[1]. In the 18th c., although *ma·mma* as used by young children was probably common, *mamma* seems to have been confined to the higher classes, and among them to have been freely used not only by children but by adults of both sexes. In the 19th c. its use was much extended, and among the lower middle class was a mark of 'gentility'. Latterly it has in England become unfashionable, even as used by children.

Aramaic מִמּוֹן *māmōn*, מַמּוֹנָא *māmōnā* riches, gain (frequent in the Targums). Hence also Syriac *māmūnā*, Goth. *mammōna* wk. masc., mod. F. *mammon*, *mammone*.

The N. T. phrase *μαμωνᾶς τῆς ἀδικίας* (Eng. version 'mammon of unrighteousness'; earlier versions, 'mammon of iniquity', 'wicked mammon', etc.) represents exactly the Aramaic *māmōn di-r'shaꜤ*, 'riches or gain of wickedness' (Targ. Hab. ii. 9), and approximately the more common *māmōn di-sh'qar*, 'riches of falsehood'.]

1. The Aramaic word for 'riches', occurring in the Greek text of Matt. vi. 24 and Luke xvi. 9–13, and retained in the Vulgate. Owing to the quasi-personification in these passages, the word was taken by mediæval writers as the proper name of the devil of covetousness. This use appears in English in the 14–16th c., and was revived by Milton (*P. L.* I. 678, II. 228). The word does not occur in the N. T. translations of Wyclif and Purvey (who substitute *richessis*), but it was used by Tindale (1526–34) and subsequent translators, with the exception of those of the Geneva version. From the 16th c. onwards it has been current in English, usually with more or less of personification, as a term of opprobrium for wealth regarded as an idol or as an evil influence.

(The ON. *man* str. neut., slave, may possibly be related, but the connexion is doubtful.) The OE. plural *mɛnn* is the regular descendant of OTeut. **manniz*, and the dative *mɛnn* of OTeut. **manni*, from the cons.-stem **mann-*.

It was formerly regarded as certain (on the ground of the supposed correspondence with Skr. *manu* man) that the *nn* of **mann-* was derived from an origional *nw*. The now prevailing view is that the second *n* represents the zero-grade of the suffix of a stem of which the Gothic form would be **manan-*. This hypothesis accounts for the otherwise obscure form *mana-* which the word assumes in Gothic compounds; if it be correct, the Teut. word and the Skr. *manu* cannot have any nearer relation than that of independent derivatives of a common root. They have been usually referred to the Indogermanic **men-, *mon-*, to think (see MIND *sb.*), so that the primary meaning of the sb. would refer to intelligence as the distinctive characteristic of human beings as contrasted with brutes. Many scholars, however, regard this as intrinsically unlikely to have been the original sense, though no plausible alternative explanation has been suggested.

In all the Teut. langs. the word had the twofold sense of 'human being' and 'adult male human being', though exc. in Eng. it has been mainly superseded in the former sense by a derivative (Ger., Du. *mensch*, Sw. *menniska*, Da. *menneske*: cf. MANNISH *sb.*).]

I. 1. A human being (irrespective of sex or age); = L. *homo*. In OE. the prevailing sense.

†**a.** In many OE. instances, and in a few of later date, used explicitly as a designation equally applicable to either sex. *Obs.*

In OE. the words distinctive of sex were *wer* and *wif*, *wæpman* and *wīfman*.

b. In the surviving use, the sense 'person' occurs only in general or indefinite applications (e.g. with adjs. like *every, any, no*, and often in the plural, esp. with *all, any, some, many, few*, etc.); in modern apprehension *man* as thus used primarily denotes the male sex, though by implication referring also to women.

The gradual development of the use of the unambiguous synonyms *body, person, one*, and (for the plural) *folkis, people*, has greatly narrowed the currency of *man* in this sense; it is now literary and proverbial rather than colloquial.

Manage (mæ·nėdʒ), *v.* Forms: *α.* 6 **manege, mannadge,** 6–7 **mannage,** 6– **manage.** *β.* 6–8 **menage.** [Recorded earlier than the cognate MANAGE *sb.*, and prob. directly ad. It. *maneggiare* to handle, esp. to manage or train (horses) = Sp. *manejar,* F. *manier*:—vulgar L. type **manidiāre,* f. L. *man-us* (It., Sp. *mano,* F. *main*) hand.

Although the etymological form *manage* appears in our earliest example, the ending was, as in the sb., already in the 16th c. assimilated to the common suffix -AGE. The form *menage* in early examples is taken from the sb.; but in the late 17th and early 18th c. it was chiefly used where the sense closely approaches that of the F. *ménager* to use carefully, to husband, spare, f. *ménage* household. This Fr. vb. certainly influenced the sense-development of the Eng. word: indeed, in the writings of Dryden and his contemporaries, there are frequent instances of *manage* (as well as of *menage*) which can only be regarded as conscious gallicisms.]

2. *Manchester School*: a name first applied by Disraeli to the body of politicians, led by Cobden and Bright, who, before the repeal of the Corn Laws, held their meetings at Manchester and advocated the principles of free trade. It was afterwards extended by their opponents to the party who supported those leaders on other questions of policy. Also, in *Manchester policy*, etc., used derisively to designate a policy of laissez-faire and self-interest.

1848 DISRAELI *Sp. Ho. Hence **Ma·nchesterdom** [formed after G. *Manchesterthum*, a word used by German socialists] = next; **Ma·nchesterism,** the principles advocated by or attributed to the 'Manchester school'; **Ma·nchesterist,** one who supports Manchesterism.

1882 J. RAE in *Contemp. Rev.* Jan. 101 Much of his [Todt's] work is devoted to show the..inner antagonism of Christianity and Manchesterdom. .. At Rouen, a ring-shaped cake of bread (in ordinary Fr. called *couronne*) is known as *manchette*, lit. 'cuff' (Robin *Patois normand*, and Littré *Suppl.*), but this name (which may be of recent origin) is obviously descriptive of shape, while the Eng. word in early use denotes a certain quality of bread. The identity of sense with PAINDEMAINE, DEMEINE, *mainе-bread* (see MAINE *sb.*) suggests the possibility of etymological connexion with those words. In classical L. *mancipium* meant acquisition by purchase, absolute ownership, hence *concr.* a slave. In med.L. it meant also the office or function of a *manceps* or buyer in of stores (in late L. this word sometimes denoted the manager of a public bakery : so in late Gr. form *μάγκιψ*). It may be conjectured that in monastic use the word denoting the office was applied (like many similar terms) to the person charged with it, and that this application is the source of sense 1 below, which seems not to be known in OF.]
